

## CASE STUDY 10

# Prestigious Hotel, Central London, SE1

We are pleased to introduce our latest project of four stylish, high quality platform lifts installed within a prestigious Central London hotel. Each lift was powder coated in the clients' specific choice of colour, and the style, design and lift operation were chosen to provide ease of access at the points where the original floor levels of this beautiful, historic building meet the new. These elegant lift installations now allow visitors, including persons with impaired mobility, to gain access to all facilities within this esteemed hotel.

### The Professional Team

Installation:

**Landmark Lifts** 

## Project Scope

The lift installations on this project were primarily required to ensure that all the hotel facilities could be easily accessed and used by all visitors including those with impaired mobility. During the refurbishment of this esteemed hotel, located in one of the worlds' most stylish postcodes London SE1, there were some small level changes where the original floor levels of this beautiful, historic building meet the new, and the four newly installed platform lifts ensure accessibility to all floors and hotel areas for all visitors and compliance with the Disability Discrimination Act (DDA) regulations.

The four platform lifts installed for the project were all Aritco 7000 platform lifts. This model of platform lift was specifically chosen as it is fully M compliant and can be supplied in a variety of door configurations and colours.

The four installations all had matching colours to suit and blend with the interior décor of the hotel but each had a different door configuration to suit the position of the particular installation within the hotel.

The location of the site in central London made it difficult to access for deliveries so all items had to be manually moved to the different levels within the hotel for installation. However Landmark Lifts is very experienced in dealing with installations and readily provided this level of customer service for the client, whilst ensuring minimum disruption to hotel visitors.

## Aesthetics

This type of platform lift can be customised with a choice of different colours, floorings and lighting options allowing the corporate style and visual requirements for any project to be met. For this central London site, each platform lift was powder coated in a chosen RAL colour to match the edgy, eclectic design and colour schemes of the hotel.

## Conclusion

Landmark Lifts was very pleased to win the tender for this contract and continues to be proudly associated with the refurbishment of such a wonderful historic building in the heart of the capital. With such excellent relationships in place with contractors and specifiers, Landmark Lifts continues to enjoy working on many prestigious projects.
